Welcome

Welcome to Intech Group, where precision meets reliability. We specialize in fabrication of transformer industry components — including rollers, core clamps, and structural assemblies — serving manufacturers who demand consistency and quality at every stage.

Our commitment to accuracy, disciplined production, and responsive client partnerships ensures that every component we deliver is built to perform. Trust our fabrication expertise to be the foundation your projects are built on.

About Intech

Welcome to Intech Group — a trusted name in precision fabrication for the transformer and heavy engineering industry. Operating through two dedicated facilities, Intech Engineers and Intech Engineering, both based in Ahmedabad, we have been delivering quality-built components since 2007 — founded and led by Mr. Unnikrishnan, a fabrication industry veteran with over 40 years of hands-on expertise spanning transformer tanks, structural assemblies, and critical engineering fabrication.

Our manufacturing facility is equipped with advanced machinery including CNC plasma cutting, hydraulic presses, EOT cranes, and a dedicated team of skilled welders, fitters, and engineers

— enabling us to take on a wide range of fabrication jobs with precision and efficiency. From concept to final delivery, we ensure every component meets the technical requirements our clients depend on.

Over the years, Intech Group has earned the trust of leading transformer manufacturers, engineering companies, and industrial clients across India and internationally. Our product range includes transformer tanks, roller assemblies, storage tanks, induction furnace bodies, coil winding machine, core building table, core clamps, condensers, piping jobs, and precision structural components — each built to meet the critical fabrication requirements of our clients and delivered consistently, accurately, and on time.

Our Vision

We envision a future where every client we work with sees Intech Group not just as a vendor, but as an extension of their own manufacturing team. A partner who understands their drawings, respects their timelines, and takes ownership of quality as seriously as they do. We strive to build relationships that go beyond transactions, where trust, transparency, and consistent delivery form the foundation of every engagement.

Ultimately, we aim to be the first name our clients think of when precision fabrication matters.

Our Mission

We are on a mission to make our clients' manufacturing journey smoother, faster, and more reliable. By understanding their technical requirements deeply and communicating openly at every stage, we ensure that every component we deliver meets the exact standard our clients expect. Our goal is to be a fabrication partner that clients never have to worry about.

We believe to manufacture with precision, deliver with integrity, and grow as a partner our clients are proud to work with.

What we manufacture

At Intech Group, we fabricate a wide range of precision components and equipment serving the transformer and heavy engineering industry. Every product we manufacture is built to exact specifications, ensuring quality and reliability at every stage.

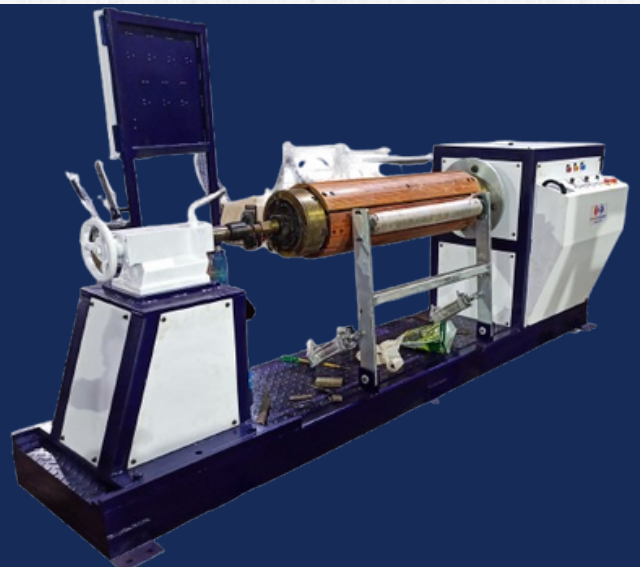

Transformer Tanks & Accessories

Transformer tanks fabricated up to 500 MVA rating, along with all associated accessories and fittings.

Coil Winding Machine

Custom-built coil winding machines designed for transformer coil manufacturing.

Oil Storage Tanks

Fabricated storage tanks for industrial applications, built with leak-proof construction to handle various fluid storage requirements.

Roller Assembly

Heavy-duty roller assemblies for transformer tanks, built to handle high load ratings reliably

Radiator Fins Testing Tank

Fabricated testing tanks used to pressure-test radiator fins for leakage and structural integrity before assembly.

Heating & Vacuum Oven

Large-scale ovens fabricated for transformer drying and heating processes.

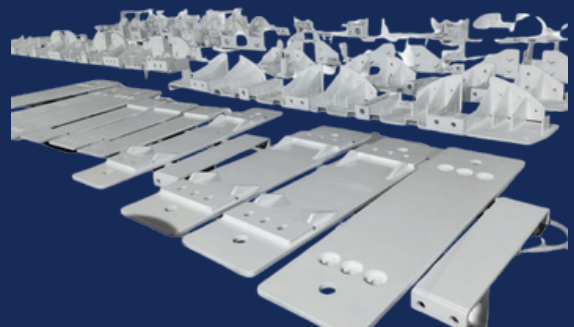

Induction Furnace Body

Structural fabrication of induction furnace bodies built for heavy-duty industrial melting applications.

Core Clamps

Precision-cut and fabricated core clamps designed to secure transformer cores with accuracy and structural integrity.

- Thermosyphon — Fabricated thermosyphon units used in transformer cooling systems, designed to enable natural convective oil circulation for efficient heat dissipation.
- Condensers — Custom fabricated condensers built to precise dimensional and functional specifications for transformer and industrial cooling applications.
- Evaporators — Fabricated evaporators designed for Vapor Phase Drying (VPD) System.
- Core Building Table — Sturdy fabricated tables designed for transformer core assembly, ensuring the flatness and stability required for accurate core stacking.
- SS and MS Canopies — Canopies fabricated in stainless steel and mild steel, designed to provide weather protection and structural enclosure for transformers and outdoor electrical equipment.
- Piping Jobs (MS / SS) — Precision piping fabrication in mild steel and stainless steel for vacuum plants, filtration systems, and various industrial plant applications.
- Structural Fabrication Jobs — Custom structural steel fabrication tailored to client drawings and specifications, covering any kind of critical or general structural requirement across industries.

and more...

Our Facility

At Intech Group, our manufacturing infrastructure is built to handle complex, high-capacity fabrication jobs with precision and efficiency. Across our two facilities in Ahmedabad, we maintain a well-equipped plant with modern machinery and a skilled workforce dedicated to delivering quality at every stage.

Our Clients

Over the years, Intech Group has had the privilege of working with some of the most respected names in the transformer and heavy engineering industry. These relationships, built on trust, quality, and consistent delivery, are a testament to our commitment to excellence.

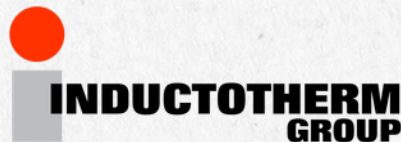

TRANSFORMERS & RECTIFIERS
(INDIA) LTD.

TRANSFORMERS PVT. LTD.

RAKHE SAB CONTROL MEIN

The most relied name in CRGO products

...and many more across India and internationally.

Get in Touch

We would love to hear from you. Whether you have a requirement, a technical query, or simply want to explore how Intech Group can support your manufacturing needs — reach out to us and we will get back to you promptly.
